

ANOKA POLICE DEPARTMENT

CRIME MAPPING

The Anoka Police Department is pleased to announce the online crime mapping application Raids-Online available to the citizens of Anoka. Earlier this year, we began working with BAIR Analytics to provide you with their technology for both crime mapping and analysis. This website is free to the public and is also available as mobile apps for iPhone and Android operating systems. Although we are not providing data on every crime reported to our agency, the vast majority of reported crimes are available for viewing.

Raids Online allows the user to select various offenses and date ranges to customize their search and in the future “layers” added to the software that will further allow you to select a specific neighborhood. Additionally, users are able to sign up for daily, weekly, or monthly email alerts about crime occurring within a certain distance of an address. The website is www.raidsonline.com

***Please be aware we are currently experiencing a delay in crimes being mapped due to transitioning to a new records management system. We are working to resolve this issue.*
